About the Clinical Trials Symposium 2024

Themed “The Promise of Clinical Trials: Transforming Tomorrow’s Health”, the Symposium brings together clinicians, researchers, academics and industry experts in clinical research from around the world, offering an excellent opportunity for knowledge exchange and networking, sharing practical insights of clinical trials in improving patients’ lives and contributing towards positive health and economic outcomes in Singapore and beyond.

Event Highlights

The two-day event takes a holistic approach to discuss about:

- The importance of health economic outcomes research.
- How real-world data complements traditional clinical development.
- Conducting decentralised clinical trials and introducing patient advocacy in clinical trials.
